About: Presenting OpenFest'2005 and offers for sponsorship and advertisement

Dear Mr ... / Ms ... / Sir or Madam,

We are pleased to introduce you the OpenFest project and its third release in October 2005. We would like to get you know with the different opportunities to benefit by supporting it.

OpenFest is an event dedicated to free and open source software, its admirers, creators, supporters and new fans. It is organized yearly by the Initiative committee of the Bulgarian Free Software Association and organizations, foundations and companies which fully support the idea of such celebration. The organizers' ambition is this event to become an annual international day of software freedom and free culture.

OpenFest is also a celebration of free knowledge share. It's a general view of more humane concept of world, which is free for science and culture knowledge, free of patents, free for our imagination and ideas.

Since its first organizing in 2003 the OpenFest's idea got the approval and support of the Bulgarian President Mr George Parvanov and is led under the President's aegis.

OpenFest is an open conference - the day of free software and free culture - to share our freedom. The Initiative Committee of individuals and organizations, which is organizing the event, is constantly open to new members.

We would be pleased if you have the will and possibility to support OpenFest. We hope this event will give lots of advantages for you and your company. Free software has many supporters and adherents, so we would like to offer you best opportunities for advertisement in order you to benefit by this event as well. For this purpose please allow us to offer some flexible sponsorship schemes, so that you can choose the most appropriate for you.

Please note the attached information about the event and sponsoring schemes. If you are interested or you have any questions, please do not hesitate to contact me or other representative of the organization team.

Thank you in advance.

Yours faithfully,

Initiative organization committee OpenFest 2005
